# Music and Audio Effects

- The `love.audio` module provides an interface to output sound to the user's speakers.
- Audio workflow:

# Music and Audio Effects

- Löve functions to handle audio:

- Load a new audio source:

```
source = love.audio.newSource(filename, type)
```

- Play an audio source:

```
love.audio.play(source)
```

- Stop an audio source:

```
love.audio.stop(source)
```

- Pause an audio source:

```
love.audio.pause(source)
```

More functions: <https://love2d.org/wiki/love.audio>

# Music and Audio Effects

- It's also possible to control each audio source individually:
  - Play an audio source:

```
success = source:play()
```

- Stop an audio source:

```
source:stop()
```

- Pause an audio source:

```
source:pause()
```

- Check if the audio is playing:

```
playing = source:isPlaying( )
```

# Music and Audio Effects

- It's also possible to control each audio source individually:
  - Sets whether the audio source should loop:

```
source:setLooping(loop)
```

- Sets the current volume of the audio source:

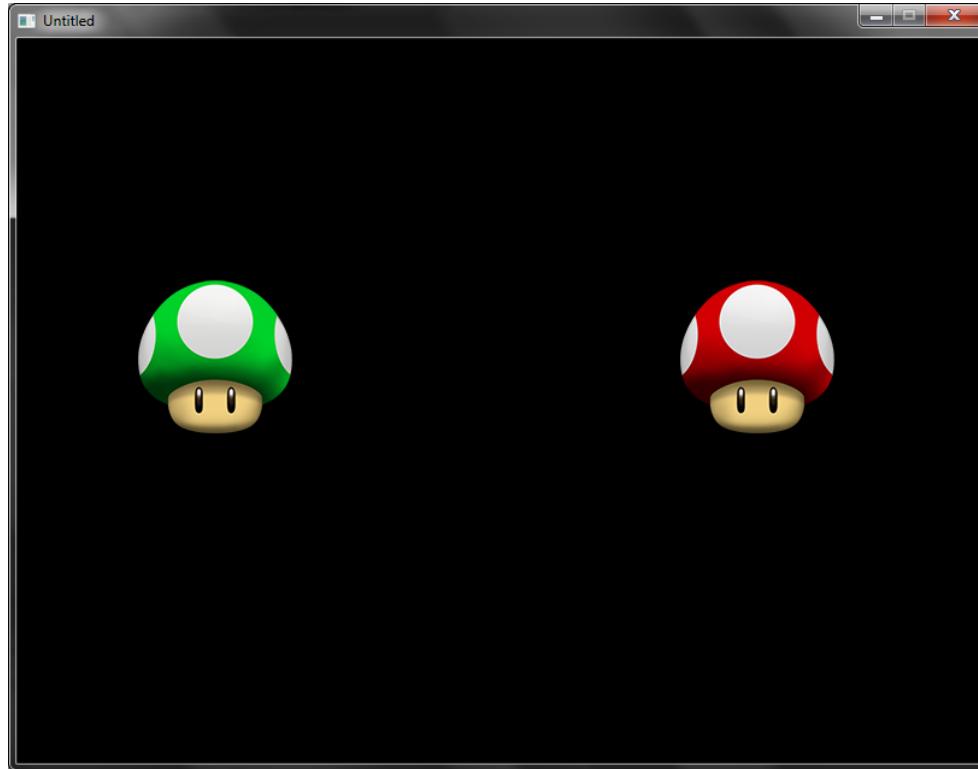

```
source:setVolume(volume)
```

- Sets the currently playing position of the audio source:

```
source:seek(offset, unit)
```

More functions: <https://love2d.org/wiki/Source>

# Music and Audio Effects – Example

[http://www.inf.puc-rio.br/~elima/intro-eng/exemplo\\_audio.zip](http://www.inf.puc-rio.br/~elima/intro-eng/exemplo_audio.zip)

# Music and Audio Effects – Example

```
local icon_1up
local icon_super
local audio_1up
local audio_super

function love.load()
    icon_1up = love.graphics.newImage("1up.png")
    icon_super = love.graphics.newImage("super.png")
    audio_1up = love.audio.newSource("1up.mp3", "static")
    audio_super = love.audio.newSource("super.mp3")
end

function CheckClick(x1,y1,w1,h1,x2,y2)
    return x1 < x2+1 and x2 < x1+w1 and y1 < y2+1 and y2 < y1+h1
end

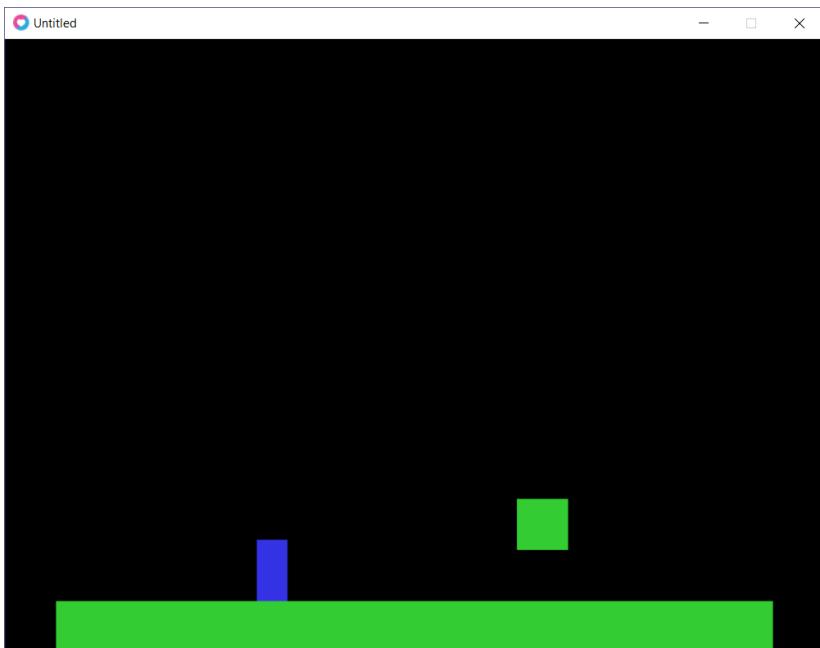

function love.draw()
    love.graphics.draw(icon_1up, 100, 200)
    love.graphics.draw(icon_super, 550, 200)
end
```

# Music and Audio Effects – Example

```
function love.mousepressed(x, y, button)
    if button == 1 then
        if CheckClick(550,200,128,128,x,y) then
            love.audio.play(audio_super)
        end
        if CheckClick(100,200,128,128,x,y) then
            love.audio.play(audio_1up)
        end
    elseif button == 2 then
        if CheckClick(550,200,128,128,x,y) then
            love.audio.stop(audio_super)
        end
        if CheckClick(100,200,128,128,x,y) then
            love.audio.stop(audio_1up)
        end
    end
end
```

# Exercise 1

- 1) Add a background music and a jump sound to the “Collision Detection with Physics” example program.
  - Search for free music and jump sounds on the internet.
  - The background music must be played in a loop.
